Backlit Banners

Product Specs

Material: Backlit Flex

Graphic Weight: 16 Oz

Printing: Full Color, Eco Solvent Printing

Open air banners have one disadvantage. They're incredible for brand acknowledgment and client consideration however once the sun goes down, they bit by bit lose their adequacy. This, nonetheless, isn't valid with flex banners. By being lit from behind, these vinyl flex banners' extraordinary development permits them to mirror any close by light source.

Vinyl Mesh Banners

Product Specs

Material: PVC Mesh Its basket weave appearance allows 37% air-flow through, making it ideal for large building, stadium and fence wraps.

Graphic Weight: 9 oz

Printing: Full Color, Eco Solvent Printing

On the off chance that you are looking forward to advance your item/administration in the outside, Vinyl Work Standards are there to fill your need. They offer most ideal message inclusion to the majority, and end up being the mystery of an effective battle. They are exceptionally favored as a result of the solidness they have. Its vinyl work material makes the total promoting pennant a climate amicable showstopper. Be it blustery, substantial downpours or splendid bright days, custom vinyl work flags do some incredible things in ensuring your limited time message in the outside.

Polyester Fabric Banners

Product Specs

Material: Polyester Fabric

Graphic Weight: 200 GSM

Printing: Full Color, Dye-sublimation Printing

The Adaptable Alternative

For what reason is a polyester texture flag an adaptable alternative? Polyester texture standards are a flexible alternative because of the wide range of ways you can hang them up. You can hang up the pennant utilizing bungees, strings, or lines. You can append the banners to posts. On the off chance that you are worried about the content or picture blurring, don't on the grounds that we utilize great polyester with zero chance of blurring at any point in the near future.

Polyester Mesh Fabric Banners

Color: Clear front / White back

Material Thickness: 150 ±10 μ m

Graphic Weight: 170 GSM

Size Variance: +/- 3mm

Printing: Full Color, UV Printing

Clear Window Static Clings are similar to regular window decals except printed on clear material, making it more suitable for certain type of artworks such as logos and store hours. Custom static window clings can be applied on both sides of a glass (inside application comes with reverse printing). Therefore, we can use them as static cling window decals and rear window stickers for cars.

Window Static Clings (Opaque)

Product Specs

Material: Static White(opaque) non-adhesive, applied by Static pressure

Substrate: White PVC

Color: White front/White back

Material Thickness: 150 ±10 μ m

Graphic Weight: 190 GSM

Size Variance: +/- 3mm

Printing: Full color, UV Print

Custom Window Clings may appear to be only equivalent to window stickers, be that as it may, they are definitely not. The top notch material is the primary part that separates it from the later. Likewise, a window stick doesn't utilize glue like decals and stickers do. They can be altered by any shape or plan and take seconds to be introduced. The way that window sticks can be expelled and introduced on numerous occasions makes it a favored method for business promoting. Printlon Static Clings are made of premium-quality adaptable Vinyl, which doesn't expect glue to be put on the glass surface. Utilizing the surrounding dampness and not simply the standard glues, they set apart from conventional window stickers.
